Paul Madathiparampil

Data & Business Analyst

Glen Ellyn, IL | (331) 307-8551 | pmadathiparampil@gmail.com

PROFESSIONAL PROFILE

Analytics consultant with 5+ years of project-based experience across data management, business process engineering, and financial data analysis, most recently applying that to AI model training and evaluation. Proven track record delivering data and analytics projects for Fortune 500 organizations and global enterprises as well as startups, with strengths in data validation, workflow automation, and cross-functional collaboration with business, IT, and finance teams to improve data quality and deliver solutions across SAP, Salesforce, Apptio, and Python/SQL-based environments.

CORE COMPETENCIES

AI Model Training & Evaluation: LLM training and evaluation, multi-hop reasoning task design, golden trajectory/rubric development, prompt engineering, dataset development, model performance analysis

Data Management & Governance: Data cleansing, validation, mapping, and analysis; master data management; data warehousing; data quality management

Business Process Improvement: Process re-engineering, workflow automation, requirements gathering, process documentation, reporting analysis

ETL & Data Integration: Data extraction, transformation, and loading (ETL); data standardization; cross-system integration

Enterprise Applications: Apptio TBM (Cost Transparency, ApptioOne, IT Financial Planning, TBM Studio); SAP (MDM, MM, BusinessObjects); Salesforce CRM; ServiceNow; Okta

Master Data Domains: Customer, Vendor, and Material Master Data

Analytics & Reporting: Ad hoc analysis and reporting, dashboard development, UAT, scenario planning, financial reporting

Technical Tools: SQL, Python (Data Analysis), Power BI, Excel (Advanced Functions, VBA), Claude Code

Scenario Planning & What-If Analysis: Building multi-scenario models to stress-test assumptions and compare alternative planning outcomes

Statistical Analysis: Statistical modeling, hypothesis testing, and experimental design

PROFESSIONAL EXPERIENCE

Data Analyst – PII/BII **2026 – Present**

micro1, Inc.

- Validated and analyzed large-scale business datasets for accuracy, completeness, and relevance, producing training-ready data for AI model development while also training an AI model on data privacy standards
- Audited metadata and code outputs for completeness, consistency, and schema compliance, catching anomalies that would have degraded data quality and model performance
- Classify direct and quasi-identifiers across complex records to sharpen PII/BII detection and redaction accuracy
- Conducted document-level review under strict PII handling protocols, so project deliverables met data privacy and security requirements

Fellow, LLM Evaluation - (Financial & Analytical Reasoning, Data Science) **2025 – Present**

Handshake AI

- Analytical Reasoning LLMs: Engineer adversarial tasks and 25-criterion grading rubrics that expose genuine reasoning gaps and analytical blind spots such as misread ambiguity, missed data issues, and flawed methodology to hold leading frontier model scores below 50%
- Build underspecified, end-to-end analytics tasks from real occupational materials, pairing an ambiguous business question with a messy multi-file corpus (spreadsheets, CSVs, JSON, PDFs) that requires data cleaning, decisive analysis, and one validated, decision-ready recommendation

- Finance LLMs: Design web-dependent evaluation tasks testing multi-hop reasoning, information retrieval, tool use, and multi-source research, pairing each with a golden trajectory and reference output to establish ground truth
- Build multi-hop reasoning evaluations with structured reasoning graphs and grading rubrics, requiring finance models to chain verified lookups and exact calculations across SEC EDGAR filings, historical market data, and FRED economic data
- Use Python, SQL, and Claude to create, parse, and analyze datasets and databases containing millions of data points, sourcing verified figures for multi-hop or analytical reasoning tasks

Full-Time Undergraduate Studies **2023 – 2026**

Arizona State University

• Completed B.A. coursework in Applied Technology and Business Solutions full-time, building on prior functional analyst experience before transitioning into AI model training and evaluation work

Apptio TBM Analyst **2022 – 2023**

Deere & Co. — Contract | Moline, IL

- Served as Apptio TBM Analyst on the Global IT Product Portfolio Management team, working within the Apptio TBM Unified Model across Cost Transparency, ApptioOne, IT Financial Planning, and TBM Studio to improve financial reporting, data integration, and cost transparency
- Developed complex, formula-driven reports and cost models for Finance and Accounting, managing rigorous UAT/QA cycles to ensure changes flowed accurately across interconnected tables, reports, and models
- Re-engineered cost allocations, distributions, and flows to accommodate organizational changes, maintaining accurate visibility into billions of dollars in IT spend
- Created and monitored DataLink connections to automate data extraction and integration from multiple source systems, increasing reporting efficiency
- Led monthly forecasting and planning cycles, administering open/close processes and supporting annual and strategic planning to give stakeholders timely visibility into IT spend and performance

Master Data Analyst **2020 – 2021**

Syngenta AG — Contract | Downers Grove, IL

- Served as cross-functional master data analyst, partnering with IT, Marketing, Supply Chain, Finance, and Sales to maintain master data quality and resolve issues impacting settlement cycles and customer deliveries
- Collaborated with the Data Insights & Analytics team in an Agile environment to execute data validation, integration, and alignment initiatives across SAP MDM, Salesforce CRM, Okta, Ag Gateway, and other enterprise platforms
- Enhanced and maintained customer master attributes supporting ongoing business operations and downstream reporting for hundreds of thousands of records and accounts
- Analyzed and optimized business processes through workflow automation, process re-engineering, and documentation, improving operational efficiency and data governance practices
- Created and maintained B2B and CRM master data using complex queries and reporting tools within SAP, Salesforce, and DemandTools, ensuring high levels of data accuracy and consistency

Financial Analyst **2019**

SAP America, Inc. — Contract | Downers Grove, IL

- Supported enterprise data cleansing and migration initiatives for Sales, Contracts, and Industry Value Engineering teams, independently cleansing, transforming, and mapping unstructured M&A data from more than 300 companies into standardized target formats
- Reported directly to the VP of Industry Value Engineering, presenting findings, resolving data integrity issues, and documenting database discrepancies to support executive decision-making
- Extracted and validated financial information related to software licensing agreements, including revenue streams and contract terms, performing QA on reports and underlying datasets
- Utilized VBA-driven, automated Excel solutions to reconcile financial reports against source databases, improving accuracy and automating report population

SAP MM / Data Analytics Intern **2016 – 2018**

KERA Systems, Inc. | Wheaton, IL

- Performed data collection, analysis, transformation, and reporting for data management systems
- Completed assigned data reconciliation and validation tasks
- Leveraged the LSMW tool for data conversion
- Supported consultants in configuration and development for SAP master data conversion projects

EDUCATION

Arizona State University **2023 – 2026**

B.A., Applied Technology and Business Solutions — Magna Cum Laude

Relevant Coursework: Business Intelligence, Business Data Visualization, Advanced Excel in Business, Business Process Management, Business Agile Project Management, Introduction to Information Systems, Supply Chain Management Foundations, Business Capstone

Iowa State University **2016– 2018**

General Finance Coursework
